EXPERIENCE

STEM Intern

PCCW Limited

Jun 2026 – Aug 2026

- Developed a Python pipeline that extracts, aligns, and validates high-frequency IoT device telemetry against external HKO weather data for downstream ML model readiness. Applies time series decompose models and different statistical tests (including non-parametric validation, Levene's test, etc.).
- Developed and containerized a high-throughput MCP gateway using FastAPI and Docker, establishing a standardized, discovery-capable bridge between LLM frontends and backend automation pipelines.

AI Developer Intern

Jun 2025 – Oct 2025

Ricoh Hong Kong Limited

- Develop AI applications
- Developed AI-powered educational agents to streamline administrative tasks for school.
- Focus on data preprocessing to enhance large language model (LLM) performance for data analysis.
- Pitching proposed solutions to three schools and business team.

Co-founder, Operation

WriteRight

Dec 2024 - Now

- An educational technology project aims at detecting wrongly written Chinese character and provide real-time feedback.
- Orchestrated early-stage fundraising and partnership development; elevated initial brainstorming concepts into USD \$200,000+ in seed funding and three institutional collaborations.
